

CLEAN WATER IS LIFE!

FPC CLEAN WATER MINISTRY TEAM

COME JOIN US!

St. Pierre School, Church and the Haiti Micah Project is our partner community located in Mirebalais, Haiti. Pictured on the left is the dedication service where we celebrated a clean water filtration system with solar power – now owned and operated by our Haitian partners. This system was taught and installed in September, 2011. Our joint goal is to provide clean water to improve the health of the community – particularly for children - where cholera is a deadly issue.

Central Moravian Church in Bluefields, Nicaragua has been a partner for many years. Pictured on the right is a standard water filtration system which the local community now successfully operates. Part of our Clean Water Ministry team traveled to Nicaragua in July, 2011 to instruct and help install a clean water system. In only a few months time, the system is operating, producing revenues, employing two people full-time and is sustainable.
